Subject: ICOM W21 A -- what's the deal?

Tucker is advertising this for \$299 in Nov QST. The  
picture with the advertisement shows an HT with no  
DTMF keypad, and the advertisement says "DTMF operation  
with optional mike". On another page, the same HT is advertised  
by somebody else for \$429, and the picture shows an HT with  
DTMF pad etc. I think that one says W21 AT. But there is yet  
another advertisement (Jun's) which says W21 AT, but now again  
without the keypad. So, what's going on here? Are there two  
different models? Inquiring minds want to know :-)
